## Week14 Reflection

---

20 pts Questions **Cognitive: (Wow, I learn?... Ok that is deep!)**

- Why is this week's topic important for teamwork?

Synergy is important to teamwork because if we don't have any then the teamwork would be just as good as combining all our solo work. We need it or there would be no point.

- How do plan on contributing to the team, besides completing your tasks?

The team is gone, but I do plan on finding ways I can help bring synergy to my future teams in the class and workplace.

- How does your experience relate to other experiences you have had?

I have been able to see over this class the synergy we had as a team when it came to filling out our reports. What would have taken forever we were able to fill out so quickly due to our teamwork.

- How does your experience relate to other classmates' experiences?

I feel like my experience can relate to my classmates due to it being an experience we shared. I am sure it will drive us all to finish our projects in future workplaces and class with a desire to have that synergy in the future.

- Tell me about what you taught someone? And what did they learn, that they didn't know before?

I taught my friend Lauren what the word synergy means and how it is needed in a team. She seemed relatively fascinated by the idea and we discussed it in the context of her romantic relationships.
