Name: Parker

Total Points 100

20 pts Questions **Cognitive: (Wow, I learn?... Ok that is deep!)**

- Why is this week's topic important for teamwork?

Cooperation is the ability to actually work with someone in a productive manner. If all we are doing as a team is not getting anything done, then why should we have team work at all.

- How do plan on contributing to the team, besides completing your tasks?

With class over I have thought about how I can keep helping the team out. I have decided that keeping in touch with them after the semester will allow them to reach out and that would be great.

- How does your experience relate to other experiences you have had?

I have had situation where I got along with other people really well we could see eye to eye, but when it came to actually working together they never wanted to cooperate. They were so solo that it led to a lot of issues.

- How does your experience relate to other classmates' experiences?

My experience has helped me realise that I am very solo when it comes to work. My way or no way. That is simply not right. I need to learn to cooperate so they do not end up having the same experience I have had in the past.

- If this was a religion class, how would you relate this week's topic to the gospel?

I would relate the topic of cooperation to the gospel in the way that it is the same as why we go to church. We are trying to help each other all along the way.
