Wk 09: Reflection

Reflection

Name: Parker Jackman

Total Points: 100

20 pts Questions **Cognitive: (Wow, I learn?... Ok that is deep!)**

- Why is this week's topic important for teamwork?

Ethics are very important to teamwork, when we are unethical we are hurting the people in our team either mentally or their integrity.

- How do plan on contributing to the team, besides completing your tasks?

I plan at looking more into the ethics of how I get my work done, and by only expecting us to always be ethical when we do all of our projects.

- How does your experience relate to other experiences you have had?

When we were in class discussing some of the ethical issues that relate to coding, it reminded me of all the work I did in drug research. Everything we did was make sure it was ethical before we could start a new study. I was pleased to see how it relates to coding.

- Tell me about what you taught someone? And what did they learn, that they didn't know before?

I took the time to teach my friend mason about the code of ethics in relation to coding. He thought it was fascinating. He had never heard of the coding cod of ethics before.

- If this was a religion class, how would you relate this week's topic to the gospel?

I would relate the code of ethics to the commandment love one another. The commandment is simple, but it encompasses so

much, just like how the code of ethics is simple but it implies a lot of great principles.
